

Ionașcu Andrei

Data / ML Engineer • MSc Data Science @ Uppsala University

Uppsala, Sweden • ionascuandrei320@gmail.com • 0749 913 128 • linkedin.com/in/andrei-ionascu • github.com/IonascuAndrey

PROFILE

Data/ML engineer and MSc Data Science student who likes owning problems end to end – from messy raw data to a model, pipeline or product in production. Comfortable across the stack: Python data work, cloud (Azure, Snowflake), machine learning and LLMs, and full-stack web from earlier work shipping e-commerce modules. I move fast and ask the business questions early.

PROFESSIONAL EXPERIENCE

Data Engineer Endava

May 2025 – Present

- Own the analysis approach for turning highly heterogeneous client Excel data into a standardized database with Python (pandas, NumPy): header-similarity bucketing, regex filtering and header diffing cut manual analysis time by roughly 90%.
- Build on Azure and Snowflake for an insurance underwriting workbench, translating business concepts into technical requirements while working directly with client stakeholders.
- Joined through the selective Dava.X Academy: instructor-led training in RDBMS, ETL, testing, machine learning, data science, MLOps and business analysis, with a focus on AI-assisted development.

Web Developer Weblir

July 2021 – October 2022

- Designed, built and tested PrestaShop e-commerce modules end to end in a two-person team, shipping from scratch to production.
- Back end in PHP and MySQL; front end in JavaScript, HTML/CSS and Smarty.

LEADERSHIP & INTERNATIONAL ENGAGEMENT

Leaders Foundation — Community Manager

2025 – Present

Run participant selection and event logistics for two programmes – interviews, budgeting, and communication with students, mentors and partners.

Susterum — Accelerator Cohort

2026 – 2027

Selected for a European programme where people aged 18–25 design, launch and sustain real-world communities with local impact, supported by a retreat, a matched mentor and a peer cohort.

The Next Generation of Innovators

2025

STEM innovation programme: developing ideas, collaborative problem-solving, and pitching solutions to a panel.

ASMI — Volunteer, Management & Fundraising

2023 – Present

Supported fundraising and sponsorship efforts, event preparation, and outreach and engagement strategy.

SELECTED PROJECTS

Multimodal Emotion Recognition — Bachelor Thesis

Python, PyTorch, XAI

Built and compared six models across text, audio and image with three fusion strategies and explainability analysis (Integrated Gradients, Grad-CAM); a feature-caching layer cut fusion experiments from hours to minutes.

LLM Persona Bias Experiment

Experiment design, LLMs

Designed a repeated experiment across four LLMs, seven personas and three prompts (five runs each) to measure behavioral consistency and bias; wrote up the results as a CATS 2026 submission.

EDUCATION

MS in Data Science

Uppsala University
Department of Data Science
August 2026 – June 2028

BS in Computer Science

University of Bucharest
Faculty of Mathematics and Computer Science
October 2023 – June 2026

SELECTED PROGRAMS

EuroTech x HKTE Hackathon

Volunteer, EuroTech Federation deep-tech network (Munich, 2026)

Leadership Summer School (LSS)

Selective CEE leadership programme, Mummert Alumni Association (2026)

DPIN Brussels AI Governance Hackathon

Organizing team, EU policy hackathon (Brussels, 2027)

Erasmus+ — Digital Active

Youth mobility on media & intercultural learning (Prague, 2021)

CERTIFICATIONS

Databricks Data Engineer Associate

December 2025

Microsoft Power BI Data Analyst Associate

December 2025

Microsoft Azure Data Fundamentals

October 2025

Microsoft Azure Fundamentals

September 2025

Microsoft AI Fundamentals

September 2025

Technical foundation

Python (pandas, NumPy, scikit-learn, PyTorch, Hugging Face), SQL/PL-SQL, Azure, Snowflake, Databricks, Git; JavaScript, PHP, C#/.NET, C/C++, Java

Languages

Romanian — Native
English — C2, Cambridge CAE Certified

Focus

Data engineering, ML & LLMs, cloud platforms, shipping end to end
